GasDandy™ Product Description:

GasDandy™ is an easy-to-use tool that tracks your vehicle's mileage and vital statistics, providing data that can be used for both business and personal purposes, including tax deductions!* This simple program calculates mile-per-gallon averages and even reminds drivers when maintenance such as oil changes and tire rotations are due, ensuring that tune-ups and car care, which can prolong the life of a vehicle, are taken care of on time. As a vehicle's information is entered into the program, GasDandy™ generates a MPG graph, helping users to visually understand their driving characteristics and quickly identify changes and trends that may occur over time in their vehicles performance. It also provides a convenient "notes" section that helps users save information, such as changes to spark plugs, air filters, wipers, and records of repairs, that is recorded for future reference. All user data can be printed out in uncomplicated and accessible reports, offering a handy, trouble-free way to keep tabs on your vehicle's performance and to streamline the calculation of business vehicle expenses. And since no internet connection is required, GasDandy™ can be used at home, at the office, or on the road.

There is a one-time purchase fee of \$19.95 to upgrade to the full version of GasDandy™, which can make unlimited entries and record user data for up to three vehicles at a time. You can even personalize your own edition of GasDandy™ by using the preferences settings to add your own customized background art and vehicle photos. Take GasDandy™ for a road test - download the Trial Version of GasDandy™ and get the first five calculations free!

With the increasing cost of gasoline, GasDandy™ is a must-have for any car owner. What's more, GasDandy™ is not only user-friendly, but it's environmentally friendly, too: it aids the consumer in becoming conscious of their vehicle's performance and the number of miles driven over a particular time period, increasing awareness of the driving habits that contribute to greenhouse gases.

**(See your personal accountant for advice, as GasDandy™ cannot make tax or financial recommendations and cannot suggest the best way for you to record or store this information.)*

About

"Talk about being able to see and control your expenses - right down to the penny! GasDandy™ has it all there for you. This is something I didn't know I needed, but now I wouldn't drive without it... it's the best little tool for frugalling that I've seen in a long while."
